

# DEMOLITION PERMIT APPLICATION

Town of Gilford ~ Department of Planning and Land Use  
47 Cherry Valley Rd ~ Gilford, NH 03249  
Phone: 603-527-4727 ~ Fax: 603-527-4731 E-mail: [planning@gilfordnh.org](mailto:planning@gilfordnh.org)

## Demolition Permit Application

Street address of building: \_\_\_\_\_ Tax Map #: \_\_\_\_\_, Plat #: \_\_\_\_\_

Type of building to be demolished \_\_\_\_\_

If dwelling, # of units: \_\_\_\_\_ Zone: \_\_\_\_\_

Date demolition to begin: \_\_\_\_ - \_\_\_\_ - \_\_\_\_ . Permit void six (6) months from date of issue.

### Demolition company information

Name: \_\_\_\_\_ Phone Number: \_\_\_\_\_

Street/Box No.: \_\_\_\_\_ Address: \_\_\_\_\_

City/Town: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

### Owner Information

Name: \_\_\_\_\_ Phone Number: \_\_\_\_\_ License # \_\_\_\_\_

Street/Box No.: \_\_\_\_\_ Address: \_\_\_\_\_

City/Town: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

### Applicant Information

Name: \_\_\_\_\_ Phone Number: \_\_\_\_\_ License # \_\_\_\_\_

Street/Box No.: \_\_\_\_\_ Address: \_\_\_\_\_

City/Town: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Building owner and the undersigned agree that all work shall be performed in compliance with the forgoing statements and all applicable City, State, and Federal laws.

Signature of owner: \_\_\_\_\_, Date Notified: \_\_\_\_ - \_\_\_\_ - \_\_\_\_

Note: It is required that the public works department be notified by the owner so that they may cap the sewer connection during demolition. Date notified: \_\_\_\_ - \_\_\_\_ - \_\_\_\_.

Note: If a burning is contemplated, then permission from the State Air Pollution Control Board and from the Gilford Fire Department must be sought.

Burning allowed by \_\_\_\_\_, Date: \_\_\_\_ - \_\_\_\_ - \_\_\_\_  
(Fire Department Official)

Permit Issued by: \_\_\_\_\_, Date: \_\_\_\_ - \_\_\_\_ - \_\_\_\_  
(Building Official)

Six months expire on: \_\_\_\_ - \_\_\_\_ - \_\_\_\_

Comments:

\*\* For all applicants required to pay Jeopardy Tax - A verification signature from Gilford Assessor's Office indicating the jeopardy tax has been paid will be required on this form.

## Instructions for Completing Your Asbestos Demolition/Renovation Notification Form

You are required to submit an **Asbestos Demolition/Renovation Notification Form (Notification)** for any demolition and select asbestos abatement activities.

It is not necessary to notify NHDES for a **Minor Asbestos Abatement Project**, a project with not more than 10 linear feet, 25 square feet, or 3 cubic feet of Regulated Asbestos Containing Material (RACM), or for abatement work completed by a homeowner per Env-A 1801.03.

It is your responsibility to obtain all the information necessary to complete the **Notification**. The information should be obtained during the bid process, or if not available at that time, request that the owner provide you with the information prior to your submittal of the **Notification** to NHDES. Be precise with the scheduled start and stop dates, days of the week, and time of day that the work will be performed.

Please note that the 10-day notification period is not effective until NHDES receives the complete **Notification** and the associated fee; except when NHDES grants a waiver of the 10-day notification requirement. Notification requirements are identified in Env-A 1804, *Notification and Fees*. NHDES will not accept an incomplete notification, and any abatement work performed prior to submittal of a timely and complete **Notification** is subject to NHDES enforcement actions.

The following instructions provide additional clarification for submitting a complete and timely **Notification**. Should you have any questions, please call (603) 271-1373.

## Completing the Asbestos Demolition/Renovation Notification Form

### Section I – Type of Notification (New, Revised, or Cancelled)

- a. Check the appropriate type of notification.
  - i. **A New Notification** is the first notice submitted to NHDES for any **Demolition** or **Major Asbestos Abatement Project**.
    - The **New Notification** must be received by NHDES at least 10 working days (i.e., Monday-Friday, not calendar days or holidays) prior to the project start date. An **Emergency** project that has received a NHDES waiver for the 10-day notification requirement is the only exception to this requirement.
    - When a **Minor Asbestos Abatement Project** encounters additional Asbestos Containing Materials (ACM) such that the total ACM to be abated equals a **Major Asbestos Abatement Project**, a **New Notification** and the appropriate fee must be received by NHDES at least 10 working days (i.e., Monday-Friday, not calendar days or holidays) prior to resuming work. Contact the NHDES to obtain a waiver of the 10-day notification requirement if necessary.
  - ii. **A Revised Notification** is required when there is a change in any information provided in Sections II through VIII of any previous **Notification** for a **Demolition** or **Major Asbestos Abatement Project**.
    - Notify NHDES within 24 hours of any revision to the project schedule.
      - ✓ Notification can be by phone, fax, or email (see contact information provided at the end of these instructions).
      - ✓ Within 48-hours, submit a completed **Revised Notification** to NHDES by mail with the appropriate fee.
    - Reasons for submitting a **Revised Notification** include:
      - ✓ Increase in the quantity or type of ACM to be abated.
      - ✓ Change in the **Project Type**.
      - ✓ Change in the transporter or disposal facility.
      - ✓ Change in the abatement or demolition contractors.
      - ✓ Change in the work schedule (i.e., project start or stop date, and the days and time of day that work will be performed.).
  - iii. **A Canceled Project** is a project that will no longer be completed. Please contact NHDES within 24 hours of canceling the project.

- This does not apply to an owner who cancels the work of one contractor only to hire another contractor to perform the work. In this instance, the existing **Notification** is still valid; however, the owner or its contractor must provide a **Revised Notification** to identify the new contractor and any change in the work or schedule.

**Section II - Project Type** (Demolition, Renovation, Pickup and Disposal, Emergency)

- a. Check all project types that apply to this notification.
  - i. **Emergency** projects are projects that necessitate that the work start prior to the required 10-day notification period.
    - **Emergency** projects require a waiver from NHDES. A waiver number can be obtained by calling, faxing, or emailing the request to NHDES as specified in Env-A 1804.05(a).
    - An **Emergency** project is one that requires immediate action due to public health or safety reasons, or an unexpected economic hardship. NHDES reserves the right to deny a waiver request if it does not meet the criteria of an emergency. Emergencies include:
      - ✓ Non-routine failure of a utility infrastructure such as a heating, water, or sewer system.
      - ✓ Cleanup or repair of structures damaged from fires, floods, etc.
      - ✓ Demolition or abatement ordered by a government agency.
      - ✓ Damage or deterioration of ACM such that it is determined that there is a potential for significant human exposure.
    - Obtain an **Emergency** waiver within 24 hours (or the next business day if on a weekend or holiday) of starting any emergency work.
    - Submit a completed **Notification**, to include a short description of the emergency, to NHDES within 48 hours of starting the emergency work.
  - ii. **Pick up and Disposal** projects apply to asbestos waste generated by a homeowner who completed their own asbestos abatement per Env-A 1801.03, and has contacted an abatement contractor or transporter to pick up and properly dispose of the asbestos waste.
  - iii. **Renovation** projects are either a stand-alone ACM abatement project, or ACM abatement conducted in conjunction with a building renovation.
  - iv. **Demolition** projects are:
    - Live Firefighter Training Activities conducted per Env-A 1003;
    - Entire building demolitions, including garages and sheds; or
    - Building additions that require the wrecking or removal of a load-supporting structure.

- ✓ All **Demolitions** require submission of a **Notification**, even if the inspector found no asbestos containing materials.
- ✓ All **Demolition Notifications** must identify the name of the asbestos inspector, date performed, and the results of the inspection.
- ✓ All **Demolition Notifications** must identify the start and stop dates of any asbestos abatement, or state that the ACM will be removed intact with the structural member.
- ✓ If a building is to be demolished, but is unsafe to inspect for ACM and/or must be demolished without abatement of known ACM; the building can be demolished as long as appropriate dust control measures are taken to prevent a release of asbestos fibers to the environment, and perimeter air monitoring is conducted to monitor the work. Subsequently, all demolition debris must be properly containerized and disposed of as ACM, under the direction of a NHDES licensed asbestos abatement contractor.

b. **Notification Fee Payment** - identify the fee payment due for the project.

Fees as specified in Env-A 1803.09:

\$300.00 - **Class "N" Major Asbestos Abatement Project** is any asbestos abatement project involving 260 linear feet, 160 square feet, or 35 cubic feet, or more of RACM.

\$50.00 - **Class "S" Major Asbestos Abatement Project** means any abatement project involving less than 260 linear feet, 160 square feet, or 35 cubic feet, but greater than 10 linear feet, 25 square feet, or 3 cubic feet of RACM that occurs as a stand-alone abatement project.

\$25.00 - Each **Revised Notification**.

- If the original amount of ACM to be abated fell within the **Class S** project and the **Revised Notification** includes an increase in the amount of RACM such that it becomes a **Class N** project, the fee due is \$275.00 (\$25 for the revision, and the difference between the **Class N** project fee of \$300 and the **Class S** project fee of \$50).

There is No Fee for a **Demolition** only project, except as follows:

- Subsequent revisions to Sections II through VIII of the **Demolition Notification** will require submittal of the \$25 **Revised Notification** fee.
- If during the demolition, ACM requires abatement and it meets the criteria of a **Major Asbestos Abatement Project**, submittal of a **New Notification** is required along with the appropriate fee payment.

There is No Fee for a **Pick up and Disposal** project.

### Section III – Building Information

- a. Complete all required fields.

#### Section IV – ACM Inspection and Abatement Details

- a. **Asbestos Supervisor**

- i. Enter the name of the supervisor who will oversee the project, include their New Hampshire Asbestos Supervisor Certification Number (e.g., AS123456).

- b. **Asbestos Inspection**

- i. Enter the name of the company who performed the inspection.
- ii. Enter the date of the inspection.
- iii. Enter the type of inspection e.g., visual (or assumed), samples collected and analyzed, or a combination of visual and sampling.
- iv. Check the box “No ACM Present,” if asbestos was not found during the inspection.

- c. **Demolition and Abatement Schedules**

- i. Enter the start date and end date for all work.
  - For **Demolition** projects where ACM is abated prior to the demolition, enter the start and stop dates for both the **Asbestos Abatement Schedule** and the subsequent **Demolition Project Schedule**.
  - For **Demolition** projects where the structural member is removed with the ACM intact, enter the start and stop dates for the work in the **Asbestos Abatement Schedule**.
  - For **Renovation** projects where ACM is abated either as part of a building renovation, or as a standalone abatement with subsequent renovation, enter the start and stop dates in the **Asbestos Abatement Schedule**.
  - For **Pick Up and Disposal** enter pick up date in both the start date and the end date of the **Asbestos Abatement Schedule**.
- ii. Enter the day(s) of the week that the work will be performed.
- iii. Enter the time of day that the work will be performed.
- iv. Notify NHDES via phone, fax, or email of any change in this schedule at least 24 hours prior to any change in the start or stop dates, days of the week, or time of day that the work will be performed. Subsequently, submit a **Revised Notification** to NHDES to document the change.

- d. **ACM Present and ACM to be Abated**

- i. Enter the known quantity of friable and non-friable ACM that is present.
- ii. Enter the quantity of friable and non-friable ACM that will be abated.
- iii. Provide a short description of the location of the ACM in the building. You may also submit a copy of the asbestos survey report. Then identify the ACM that will be abated.
- iv. Provide a short description of the work practices to be employed during the abatement.
- v. Refer back to **Section II - Project Type, Notification Fee Payment** to determine any change in the fee payment due.

#### **Section V – Property Owner Information**

- a. Complete all required fields including the contact person and their contact phone number. Do not abbreviate names.

#### **Section VI – Abatement or Demolition Contractor Information**

- a. Enter the full and correct business name and address of the Abatement and Demolition contractor, including the contact person and their contact phone number. Do not abbreviate business names.

#### **Section VII – ACM Waste Transporter**

- a. Enter the full and correct business name and address of the transporter, including the contact person and their contact phone number. Do not abbreviate business names.

#### **Section VIII – Final Waste Disposal Facility**

- a. Enter the full and correct business name and address of the waste disposal facility, including the contact person and their contact phone number. Do not abbreviate business names.

#### **Section IX – Certification**

- a. Once you have completed the notification, sign your name and date the form. Please print your name to ensure NHDES accurately records it in our database.

## **Additional Instructions**

### **Separate Notifications – When is a separate Notification required?**

NHDES requires a separate **Notification** for each physical project location. Examples of conditions that require separate **Notifications** include:

- An apartment or condominium complex. Submit a separate **Notification** for each apartment or condominium unit, including common areas as appropriate.
- A building or series of connected buildings containing a variety of businesses. Submit a separate **Notification** for each business, including common areas as appropriate.
- A school with multiple buildings, including dormitories. Submit a separate **Notification** for each building, including common areas as appropriate. Additional reference to a specific room where work will take place should be provided on the **Notification**.
- Two or more buildings located on adjacent lots will be demolished and one single lot will be created. Submit a separate **Notification** for each building.

### **Phased Projects - What is a phased project?**

Often larger buildings require that abatement work be conducted in phases and there will be periods of inactivity. NHDES must be notified of all phases of project activity, in order to monitor the project and perform inspections.

- a. **Notifications** submitted for work that has planned periods of inactivity require that you identify the work schedule and notify NHDES as follows:
  1. For the first phase of work, submit a **New Notification** with the first phase start and stop dates, or other schedule information.
  2. For each subsequent phase of work:
    - i. Contact NHDES 24 hours in advance of the start date of a new phase of work.
    - ii. Submit a **Revised Notification** with the start and stop date of new phases of work.
  3. For any change in the start date or when work is completed sooner than the stop date identified on the **Notification** for each phase of work:
    - i. Contact NHDES 24 hours in advance of the revised start or stop date.
    - ii. Submit a **Revised Notification** with the start and stop date of the new phase of work.
- b. Calculate the total ACM to be abated for all phases of the project.
- c. Determine the applicable fee for the project, based on the total ACM to be abated. Submit the total fee payment with the **New Notification**.

## **Submitting your completed Notification**

1. For all required **Notifications**, submit the original signed copy of the **Notification** along with any supporting documents, and the appropriate fee payment. Make sure that you make copies for your records.

2. Fee payment - make checks and/or money orders payable to:

***“Treasurer - State of New Hampshire”***

3. Submit the completed **Notification**, the applicable fee and any supporting documents to:

**New Hampshire Department of Environmental Services  
Air Resources Division  
29 Hazen Drive, PO Box 95  
Concord, NH 03302-0095  
Attn: Asbestos Management Section**

4. Submit a copy of the signed **Notification** to the code enforcement officer of the municipality where the job is located.

5. When communicating with NHDES, please adhere to the following:

### **Env-A 1801.04 Submissions To and Other Contact With DES.**

(a) Any application, request, report, notification, or other information required or allowed by this chapter to be provided to the department in writing shall be sent or delivered as specified in Table 1801-1:

**Table 1801-1: Methods of Submission with Address/Other Contact Information**

Method of Submission	Address
First-class mail	P.O. Box 95, Concord, NH 03302-0095
Delivery (commercial service or in-hand)	29 Hazen Drive, Concord, NH

(b) Any notification required or allowed by this chapter to be provided to the department by telephone, fax, or email shall be directed as specified in Table 1801-2:

**Table 1801-2: Contact Information for Telephone and Electronic Communications**

Method of Contact	Contact Information
Email	<a href="mailto:asbestos@des.nh.gov">asbestos@des.nh.gov</a>
Telephone	603-271-1373
Fax	603-271-1381

## Asbestos Demolition/Renovation Notification Form

Air Resources Division/Compliance Bureau  
Asbestos Management and Control Program

RSA/Rule: RSA 141-E:4, I and II and Env-A 1800

The State of New Hampshire  
**Department of Environmental Services**

Clark B. Freise, Assistant Commissioner

**ASBESTOS ABATEMENT**  
**INSPECTION AND NOTIFICATION REQUIREMENTS**

**Asbestos Management Program – NHDES, Air Resources Division**

**Background:**

Asbestos is a naturally occurring mineral fiber, which due to its high tensile strength and insulating qualities was used in the manufacture of thousands of products. Many of these products were used in the construction of buildings, including insulations, surfacing materials, flooring, siding, and roofing. Asbestos fibers however, are a human carcinogen and their use has been strictly controlled since the 1970's.

The greatest potential for exposure to asbestos fibers occurs when asbestos containing building materials (ACBM) are disturbed during either building renovations or demolition. RSA 141-E and the NH Administrative Rules Env-A 1800, *Asbestos Management and Control* were promulgated to address this potential hazard, and require that owners and contractors take certain steps to identify and address asbestos hazards in structures prior to beginning any work that might disturb asbestos containing materials.

**Specifics:**

Pre-Demolition/Renovation Inspection. Env-A 1803 requires that a thorough inspection be conducted for the presence of asbestos containing building materials (ACBM), prior to any demolition or renovation, in the affected portions of the structure. The inspection must be conducted by a person who has received specific training and is qualified in the identification of ACBM. A current list of qualified inspectors can be obtained by calling 603-271-1370, or from the NHDES website at <http://des.nh.gov/organization/divisions/air/cb/ceps/ams/index.htm>.

Notification of Asbestos Abatement and Demolition Work. Env-A 1804 requires the owner or operator to submit written notification to the NHDES Air Resources Division, and the local health officer, at least ten working days before any demolition activity occurs, regardless of the amount of asbestos present, if any. Env-A 1804 also requires the owner or operator to submit written notification ten working days prior to any asbestos abatement activity conducted as part of a renovation or demolition, if it involves greater than 10 linear feet, or 25 square feet of ACBM. A fee may be required depending on the amount of asbestos being removed. Notification forms can be obtained by calling 603-271-1370, or from the NHDES website [Asbestos Demolition/Renovation Notification Form](#).

Attachments: List of Common Asbestos Containing Materials

Updated: May 31, 2017

## ASBESTOS MANAGEMENT AND CONTROL PROGRAM

### Asbestos Containing Materials

---

**Note:** The following list does not include every product/material that may contain asbestos. It is intended as a general guide to show which types of materials may contain asbestos.

#### Sample List of Suspect Asbestos-Containing Materials

Cement Pipes	HVAC Duct Insulation
Cement Wallboard	Boiler Insulation Breaching
Cement Siding	Insulation
Asphalt Floor Tile	Ductwork Flexible Fabric Connections
Vinyl Floor Tile	Cooling Towers
Vinyl Sheet Flooring	Pipe Insulation (corrugated air-cell, block, etc.)
Flooring Backing	Heating and Electrical Ducts
Construction Mastics (floor tile, carpet, ceiling tile, etc.)	Electrical Panel Partitions
Acoustical Plaster	Electrical Cloth
Decorative Plaster	Electric Wiring Insulation
Textured Paints/Coatings	Chalkboards
Ceiling Tiles and Lay-in Panels	Roofing Shingles
Spray-Applied Insulation	Roofing Felt
Blown-in Insulation	Roll Roofing
Fireproofing Materials	Roof Patching Cement
Taping Compounds (thermal)	Base Flashing
Packing Materials (for wall/floor penetrations)	Thermal Paper Products
High Temperature Gaskets	Fire Doors
Laboratory Hoods/Table Tops	Caulking/Putties
Laboratory Gloves	Adhesives
Fire Blankets	Wallboard
Fire Curtains	Joint Compounds
Elevator Equipment Panels	Vinyl Wall Coverings
Elevator Brake Shoes	Spackling Compound

# ***Asbestos Management and Control Requirements*** **As a Property Management Company**

Protect your company, employees and customers by properly managing asbestos containing materials. You must take the following steps prior to any renovation or demolition work.

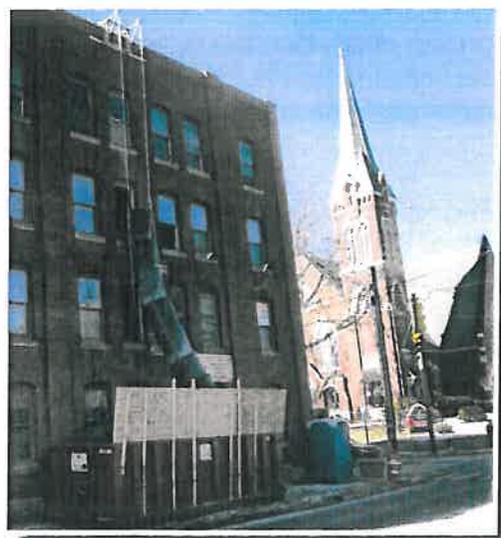

<b>Step</b>	<b>Action Required</b>	<b>When</b>
1	Inspect - Building/Work Area for Asbestos	Prior to Start of Any Work
2	Notify - NHDES and the Local Municipal Dept.	10 Days Prior to Start of Any Abatement or Demolition Work
3	Abate - All Affected Asbestos Containing Materials	Prior to Start of any Renovation or Demolition Work
4	Obtain - Clearance Determination	Upon Completion of Asbestos Abatement
5	Start - Renovation/Demolition or Maintenance Work	Upon Receipt of Clearance Determination

## **Regulatory Overview**

The State of New Hampshire has established specific requirements for inspection and abatement of asbestos-containing materials prior to any renovation, demolition or maintenance activities at commercial or residential properties. The purpose of these requirements is to prevent the release of asbestos fibers and eliminate the health risks associated with tenants or worker exposure to those fibers. It is your responsibility as a property management company, building owner or contractor to ensure compliance with the rules.

Asbestos, which is a known carcinogen, is present in various building products, including heating system insulation, vinyl floor tiles and sheet flooring, wallboard joint compound, plaster, roofing paper and shingles, cement siding shingles, and a variety of other building construction products. When asbestos is disturbed, it can break down into microscopic fibers that become airborne and can be inhaled into the lungs. Once in the lungs, asbestos may cause serious diseases such as asbestosis, lung cancer or mesothelioma.

To protect public health and reduce the risk of exposure to asbestos fibers, federal and state laws and regulations (RSA 141-E and Env-A 1800) require building owners and contractors to take specific steps to identify and address asbestos hazards associated with the structure prior to beginning any work that might disturb asbestos-containing materials. By becoming familiar with the laws and regulations, you can help protect your company from adverse financial liabilities and protect your employees, customers and the public from unintentional exposure to asbestos fibers.

## Asbestos Inspection and Abatement

State and federal regulations require a thorough inspection for the presence of asbestos-containing material prior to any renovation (including maintenance) or demolition work. Only a person who has received the proper training and accreditation for identification of asbestos-containing materials can complete the inspection. If asbestos is found and will be disturbed during any renovation (including maintenance) or demolition work, you must have it abated by a licensed asbestos abatement contractor, and disposed of at an approved facility, prior to the start of any renovation, demolition or maintenance

work. Owners or operators are responsible for the proper identification and abatement (removal or encapsulation) of all asbestos-containing materials subject to disturbance.

## Notification of Work

For building demolition projects, you must provide written notification to NHDES and the local health officer at least 10 working days before any building demolition activity occurs. This notification is required even when no asbestos is present. For other renovation or specific maintenance projects, written notification is required at least 10 working days prior to any asbestos abatement activity conducted as part of the work.

## For Assistance

Contact NHDES to determine proper notification requirements for your project, gain help understanding the asbestos requirements specific to your project, or obtain copies of rules, lists of abatement professionals, fact sheets, brochures or notification forms. Contact the NHDES Asbestos Management Section at (603) 271-1373, or visit NHDES' website at [des.nh.gov/organization/divisions/air/cb/ceps/ams/index.htm](http://des.nh.gov/organization/divisions/air/cb/ceps/ams/index.htm). The information in this sheet is effective as of March 2016.
